

SullDrip

Identifies Recycled Water

SullDrip enables effective identification and reuse of recycled and reclaimed water in your garden. Ideal for narrow garden beds or large landscaped areas. Aids water conservation.

Features and benefits:

- SullDrip's lilac colour identifies recycled water usage
- SullDrip disperses recycled water effectively
- Choose from variety of pre-punched 2Lph or 4Lph drippers, spaced at either 30 cm, 60 cm or 100 cm intervals, allowing you to choose a dripper spacing appropriate to your garden type. Closer spacings are suitable for turf and densely planted areas, wider spacings for broader plantings and native gardens
- SullDrip delivers regulated amounts of water directly to the roots
- SullDrip saves water and promotes strong, deep root development for tougher, healthier plants
- Easy installation; compatible with standard 13mm Micro Irrigation fittings
- Use pressure compensated SullDripPC for even flow in steeply sloped areas.
