

sepron Leach Drain - MK1

Introduction

With ever increasing awareness of water conservation, the **sepron** Leach Drain Mk 1 is a must for domestic wastewater treatment and is ideal for the budget conscious.

It will meet your **septic wastewater needs** and at the same time, keep your lawn green. You will enjoy **ongoing savings** by re-using your household wastewater for sub-surface dispersal and therefore reduce your overall water consumption.

The **sepron** Leach Drain is **competitively priced** and is a suitable substitution for concrete Leach Drains.

How it works

The **sepron** Leach Drain treats black and greywater combined.

The first stage of the process involves septic tanks which are used to break down solid waste and aid in the primary treatment of sewage. The wastewater then travels by gravity or pump into one of the alternating Leach Drains via a diversion valve.

The **sepron** MK1 Leach Drain is an alternating system with a diverter box which can change the flow of the effluent allowing one half to be shut off. This allows the unused half to dry out which rejuvenates the soil's ability to receive effluent.

Benefits for You

- ✓ 100% of household wastewater is dispersed under a lawn area
- ✓ No servicing contracts
- ✓ No chlorine tablets
- ✓ No pumps running 24 hours a day
- ✓ Lawns and gardens can be sustained with little or no watering
- ✓ Reduces the cost of maintenance
- ✓ No need for above surface sprinklers
- ✓ Can be bought in kit form for installation by your local plumber or installed by **sepron**
- ✓ It has a lower profile than traditional concrete drains and is made from 5mm galvanised steel coated with industrial strength PVC material, making handling easy
- ✓ Due to its innovative design and materials used, you will find it more beneficial than a concrete leach drain
- ✓ Provides a small installation footprint.
- ✓ Locally owned, designed and operated for local conditions. Manufactured in Western Australia our product is not an overseas or interstate import.
- ✓ Deal direct with the Manufacturer

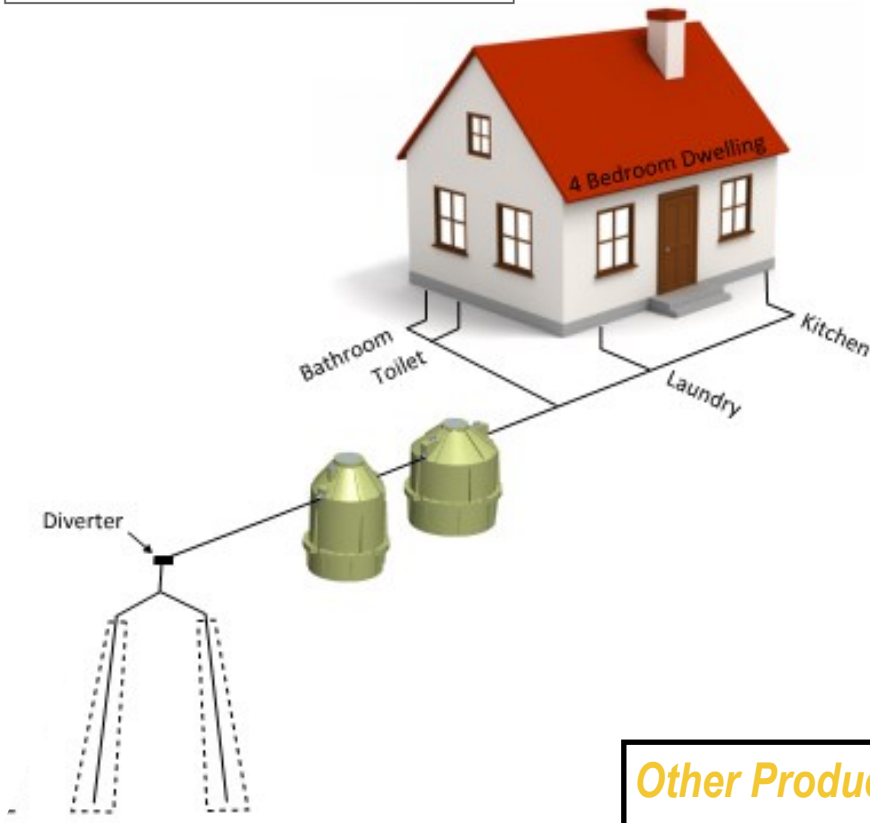

Approved by the WA Department of Health

sepron

Quality Guaranteed

Significant technical endeavour has gone into the design, development and testing of the **sepron** MK1 Leach Drain. This has resulted in a high quality product which is simple, cost effective, low maintenance and energy efficient. In addition, we offer a 5 year guarantee* on our installation.

Site Location

The **sepron** Leach Drain is a sub-surface system and it can form part of a lawn or fibrous rooted landscape.
