

Leach Drain MK2 Specifications

Department of Health WA approved Leach Drain cages are designed and manufactured by serpon. Designed as a “no fuss” solution to your leach drain requirements they can be utilised in any wastewater situation requiring a leaching system.

Manufactured from 5mm steel mesh they have been galvanized and coated with plastic coating ensuring your peace of mind for a quality product suited to take exposure to the corrosive qualities of sewage and the diversified soil types Western Australia offers.

Features

Manufactured and Designed by serpon in Western Australia this product is lightweight yet durable for installation by the homeowner or contractor/builder. Cage segments can be connected and extended to form a leach drain to the desired length suitable for the soil conditions it is to be installed in, making it suitable for any application. This enables the design of the drain to meet the Department of Health WA guidelines.
